

Portfolio Color Palette

Reference of every color token defined in **theme.css** plus the hardcoded values used across the portfolio. Each entry shows the value(s), a visual swatch where parseable, and where it is used.

1. Theme tokens — src/styles/theme.css

Site palette

Token	Light		Dark		Used for
--site-bg	#FAFAF8		#04060f		Page background
--site-text	#1A1A18		#dde4f0		Primary body text & nav links
--site-text2	#2A2A28		#aab4cc		Secondary text (preview card description, About bios)
--site-muted	#717182		#5a6480		Muted labels (project meta, captions)
--site-border	#E5E4E0		#1a2238		Hairline borders, menu row dividers
--site-surface	#FFFFFF		#080d1c		Card / popover background (Globe3D hover preview)
--site-surface 2	#F0EEE8		#0c1220		Secondary surfaces
--site-arch	#C17B3B		#d4904a		Architecture accent (badges, project type)
--site-carto	#3B6E8F		#5a9fc4		Cartography accent (badges, project type)

Landing legend palette

Token	Light		Dark		Used for
--legend-bg	rgba(245, 240, 232, 0.88)		rgba(8, 13, 28, 0.88)		Legend card background
--legend-border	rgba(160, 140, 110, 0.45)		rgba(30, 45, 80, 0.7)		Legend card border
--legend-halo	rgba(245, 240, 232, 0.8)		rgba(8, 13, 28, 0.8)		Inner ring around marker dots
--legend-arch	#c07830		#D4904A		Diamond marker fill (architecture)
--legend-carto	#2a6e9a		#5A9FC4		Circle marker fill (cartography)
--legend-label	#3a2e1e		#dde4f0		Marker label text
--legend-caption	rgba(80, 65, 45, 0.55)		rgba(180, 195, 220, 0.45)		'8 projects · ...' caption text
--legend-divider	rgba(160, 140, 110, 0.35)		rgba(30, 45, 80, 0.6)		Top divider above the count caption

Mobile menu palette

Token	Light		Dark		Used for
--menu-bg	rgba(250, 250, 248, 0.97)		rgba(12, 12, 10, 0.97)		Mobile menu panel background

Token	Light		Dark		Used for
--menu-bg-stro ng	rgba(238, 238, 232, 0.97)		rgba(4, 4, 3, 0.97)		Hamburger button (open) + bottom toggle row

shadcn / radix legacy tokens are also defined in theme.css (--background, --foreground, --card, --popover, --primary, --secondary, --muted, --accent, --destructive, --border, --input, --ring, --chart-1...5, --sidebar) but are mostly unused.*

2. Hardcoded constants

src/app/pages/Landing.tsx

Color		Used for
#04060f		Bottom-fade gradient end stop (SPACE_BG)
rgba(0, 0, 0, 0.60)		Top nav-readability gradient (start)
rgba(4, 6, 15, 0.5)		Mid-stop of bottom space-fade
rgba(255, 255, 255, 0.75)		'Architect & Cartographer' subtitle
rgba(255, 255, 255, 0.40)		'drag to rotate' hint text

All other Landing colors come from **var(--legend-*)**.

src/app/components/Layout.tsx

Color		Used for
rgba(12, 12, 10, 0.95) / rgba(250, 250, 248, 0.95)		Sticky header on non-landing pages (dark / light)
rgba(255, 255, 255, 0.92)		Logo + nav links on landing
rgba(255, 255, 255, 0.75) / 0.85 / 0.9		Header element states on landing
rgba(255, 255, 255, 0.25)		Vertical divider in landing nav

Mobile menu uses **var(--menu-bg)** and **var(--menu-bg-strong)**; row dividers use **var(--site-border)**; menu link / icon color uses **var(--site-text)**.

src/app/components/Globe3D.tsx

Three.js scene (*THREE.Color* hex)

Color		Used for
#04060f		Scene clear color
0xffffffff		Stars point material
0x0b1b30 / 0xc8d8e8		Earth base color (dark / light)
0x000000		Earth specular
0x2255aa / 0x6699cc		Atmosphere shell (dark / light)
0x4488cc		Halo layer 1 (dark only)
0x2255aa		Halo layer 2 (dark only)
0x112244		Halo layer 3 (dark only)
0x334466 / 0xffffffff		Ambient light (dark / light)
0x88aadd / 0xffff8f0		Sun directional light (dark / light)
0x1a2a44 / 0xddeeff		Fill directional light (dark / light)

Stylized texture canvas (drawn into the *equirectangular* texture)

Color		Used for
Linear ocean gradient (palette of darker→lighter blues)		Sphere base 'ocean'
rgba(220,200,160,0.14) / rgba(80,55,30,0.11)		Land fill
rgba(255,228,175,0.95) / rgba(55,32,8,0.95)		City dots
rgba(70,110,200,0.09) / rgba(80,110,160,0.10)		Minor graticule (currently inactive)
rgba(90,140,230,0.2) / rgba(70,100,150,0.18)		Major graticule
rgba(120,170,255,0.42) / rgba(60,90,150,0.38)		Equator dashed line
rgba(100,150,240,0.22) / rgba(70,100,150,0.22)		Tropic + polar dashed lines
#3d1010 / #d4b5ab		Country base fill (dark / light)
rgba(55,100,205,0.32) / rgba(95,145,205,0.42)		Minor rivers
rgba(75,135,225,0.58) / rgba(75,125,195,0.68)		Major rivers
rgba(95,145,225,0.20) / rgba(115,88,52,0.25)		Lake outlines
rgba(90,150,240,0.38) / rgba(110,85,50,0.38)		State / province lines
rgba(120,175,255,0.65) / rgba(80,60,35,0.65)		Coastlines

Color		Used for	
rgba(100,150,230,0.55) / rgba(60,80,130,0.5)			Lat/Lng labels

UI overlay (zoom controls / preview card / hint)

Color		Used for
<code>rgba(0,0,0,0.35) / rgba(0,0,0,0.25)</code>		+/- and RST button background
<code>rgba(255,255,255,0.18) / rgba(255,255,255,0.14)</code>		Same buttons on hover
<code>rgba(255,255,255,0.16) / 0.10 / 0.18</code>		Button & slider borders
<code>rgba(255,255,255,0.8) / 0.45</code>		Button text colors
<code>rgba(255,255,255,0.55)</code>		Tier-tick labels in slider
<code>rgba(255,255,255,0.95)</code>		Slider thumb + current-z label
<code>rgba(0,0,0,0.55)</code>		Thumb drop-shadow
<code>rgba(0,0,0,0.25)</code>		Slider track inner background
<code>rgba(120,200,255,0.75) / rgba(120,200,255,0.22)</code>		High LOD tier segment (active / inactive)
<code>rgba(255,210,120,0.75) / rgba(255,210,120,0.22)</code>		Mid LOD tier segment
<code>rgba(255,255,255,0.45) / 0.15</code>		Low LOD tier segment
<code>var(--site-surface) + var(--site-border) + rgba(0,0,0,0.22)</code>		Hover preview card bg / border / shadow
<code>rgba(255,255,255,0.35) + rgba(0,0,0,0.3)</code>		'DOUBLE-CLICK A MARKER' hint pill

Project markers on the globe use **var(--legend-arch)** and **var(--legend-carto)**, the same tokens as the landing legend, set on `MeshPhongMaterial.color` at marker creation time.

3. Other pages

Projects.tsx, **ProjectDetail.tsx**, and **About.tsx** consume only **var(--site-*)** tokens — text via `--site-text` / `--site-text2` / `--site-muted`, surfaces via `--site-surface` / `--site-surface2`, accent badges via `--site-arch` / `--site-carto`. No hardcoded color values.
